Everything's so much simpler.

HEATLINE ADDS DESIGNER TOUCH

Leading heating and radiator specialist Heatline has launched a comprehensive range of designer radiators and towel warmers.

With list prices starting from £195 the new range is available now and builds upon the success of the company's existing Bodrum, Marmaris, Kemer and Dalaman radiator products.

There are 17 new styles to choose from, incorporating both traditional and contemporary designs. Catering for all needs, the new range offers 32 different variations of size, shape, finish (both chrome and anthracite) and profile.

The new designer radiator range offers a style to suit any setting, and also includes both a semi-circular and a corner model. New designs vary from the extravagant Souldrop model with integrated full length mirror, to the Felmersham – a wave-shaped radiator that may be hung both horizontally and vertically.

The collection is offered in an extensive range of sizes – varying from 276mm to 1020mm in height and 175mm to 2000mm in length. Quick and easy to install and operate – and simple to service – this new range benefits from Heatline's 50 years of industry experience and offers customers reliable and high-quality products.

The designer radiator and towel rail range forms part of Heatline's broad collection of compact, cast iron, designer, tubular steel and LST radiators and heated towel rails.
